Professional Summary

I am a dedicated and hardworking ICT student studying at KTH Royal Institute of Technology with a strong interest in technology, innovation, and building products that solve real problems. I initially developed my interest in technology through building computers, which later evolved into a focus on building software and developing meaningful products. Alongside my studies, I have worked on personal and freelance projects that taught me mobile and web development in practice, with a strong record of discipline and performance in demanding environments.

Education

KTH Royal Institute of Technology 2025 – Present
BSc Information and Communication Technology Stockholm, Sweden
Relevant coursework: Programming I (Java), Algorithms & Data Structures, Discrete Mathematics, Digital Design

High School Diploma 2024
Graduated with honors – GPA: 19.8/20 Cyprus

Projects

Futsalaki 2025 – Present
React Native, Expo, Next.js, Supabase, Stripe, TypeScript
Personal futsal court booking platform for the Cyprus market (in development)

- Building a mobile app (React Native/Expo) and a web dashboard (Next.js) for venue owners.
- Integrating Supabase for authentication and database management, and Stripe Connect for payments.

WIZART – Barbershop Platform (Freelance) 2024 – Present
React, Tailwind CSS, Framer Motion, Vite – Deployed on Hostinger/Apache
Built 3 separate front-end products for a real 9-location barbershop franchise in Cyprus: a customer-facing mobile app, a public marketing website, and an owner analytics dashboard.

- Currently developed as front-end prototypes with realistic mock data; back-end integration in progress.

Spendr 2026 – Present
FlutterFlow, Firebase, RevenueCat
Personal finance mobile application for young adults

- Built a mobile app enabling users to track income, expenses, budgets, and account balances.
- Implemented RevenueCat for in-app subscriptions alongside Firebase data structures.

Experience

Beeinstein.com June 2023 – August 2023
WordPress
Educational game platform

- Contributed to the development and maintenance of an educational game platform using WordPress.
- Implemented content updates and supported platform structure to improve usability and functionality.
- Worked in a live production environment, adapting quickly to requirements and iterative changes.

Military Service July 2024 – September 2025
Cyprus National Guard

- Served in the engineering minesweeper division in a high-responsibility operational environment.
- Completed specialty training as a machine gunner, minesweeper, and radio operator.
- Selected to support the training of new recruits, developing leadership, teamwork, and discipline.

Leadership and Activities

- Competitive judo athlete, demonstrating discipline, consistency, and performance under pressure.
- Trained and supported younger athletes, helping them develop technique, confidence, and discipline.

Languages

Greek (Native), English (Fluent)
